

## **The 2013 CFBC Symposium: "*Mastering the Art of Biological Control - the history, current research and future of biological control in Ontario*"**

The Canadian Forum for biological Control Symposium was held October 22, 2013 in Guelph, Ontario, in conjunction with the JAM of the Entomological Societies of Canada and Ontario.

Four presentations were featured in the symposium to honour the 150th Anniversary of the Entomological Society of Ontario

- Biological Control of Field-crop Pests in Ontario: Evolution of the Science - Peter Mason, Eastern Cereal and Oilseed Research Centre, AAFC, Ottawa, ON
- From Disease to Genomics: A journey with forest insect viruses - Basil Arif, Great Lakes Forestry Centre, CFS, NRS, Sault Ste. Marie, ON
- Biological Control in Ontario Greenhouses – part science, part art - Graeme Murphy, Ontario Ministry of Agriculture and Food and Ministry of Rural Affairs, Vineland, ON
- From sleeping thistles to strangled canines: Ontario weed biocontrol tales - Rob Bouchier, Lethbridge Research Centre, AAFC, Lethbridge, AB and Sandy Smith, University of Toronto, Faculty of Forestry, Toronto, ON
